Dansville, N. Y.

**WHOLESALE
NURSERIES**

Messages to Purchasers and Would-be Purchasers of Fruits, Shrubs and Ornamental Trees

MAKE the growing of fruit trees my leading specialty, and compete with all legitimate growers in the American market as to high standard and excellence of my product. Dansville has an exceptional climate for the production of Fruit Trees, and to this I have added my love for the work, long years of experience and observation, and the ability to grow stock of the highest possible standard—the only way I know how. My present aim is to keep right at it, doing a little better each season, getting a firmer grip on the good will of my customers, and making the net results count to our mutual benefit.

It is an old saying that “the best is the cheapest in the long run,” and this applies probably more nearly to nursery stock than any other thing. The difference in price between a poor tree and a good tree is comparatively little, only a few cents. The average man, when he is sick, will seek out the best physician he possibly can. The same care should be taken with fruit tree selection. Results are what you are after. Trees and bushes with poor tops and roots, untrue to name, are costly at any price.

The soil in my nurseries is heavily fertilized; the trees are given constant cultivation and no effort is spared to produce the very best quality. These facts should all be taken into consideration when comparing my prices with those of other nurseries.

Finally, a word about my catalogue. I have made many changes in an effort to make it better than ever, and I hope my customers will find it a pleasure to peruse these pages from cover to cover. To every reader I extend most cordial greetings and good wishes. Whether you expect to plant a small garden or a number of acres, I trust your efforts will be abundantly rewarded.

**John W. Finn's Wholesale Nurseries,
Dansville, N. Y.**

No. 1688

CERTIFICATE

State of New York

DEPARTMENT OF AGRICULTURE

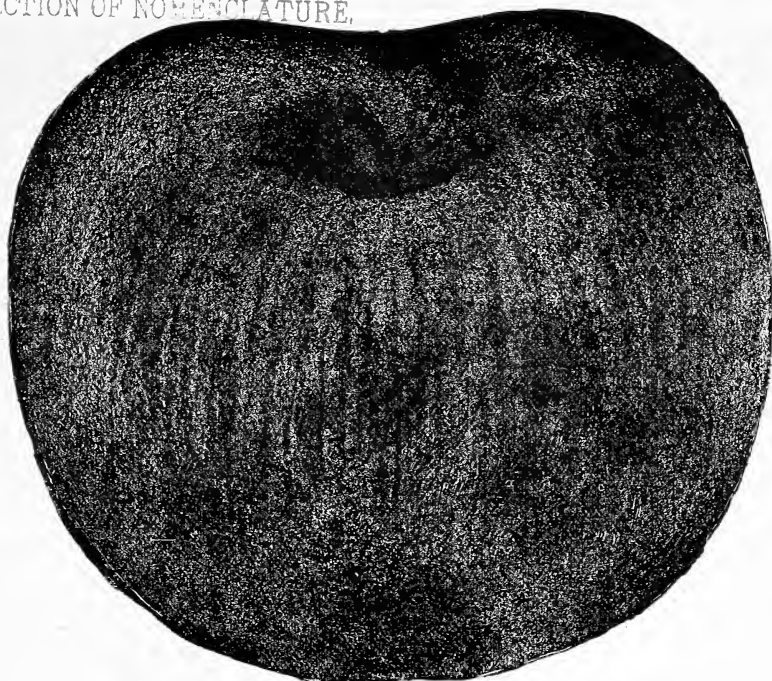

CERTIFICATE OF INSPECTION OF NURSERY STOCK—This is to certify that the stock in the nursery of John W. Finn's Wholesale Nurseries of Dansville, County of Livingston, State of New York, was duly examined in compliance with provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1915.

CALVIN J. HUSON,
Commissioner of Agriculture.

Dated, Albany, N. Y., September 9, 1914.

WEALTHY

Apples

I consider the apple the best and most profitable of all fruits. It is the fruit of first importance. If judgment is used in the selection of varieties a constant succession can easily be obtained of the most desirable fruit for family or commercial purposes. The tree will thrive in any kind of soil, but is more adapted to high or rolling land. The farmer who has a few acres in bearing apple trees is assured of a good profit with little labor. Our prices are as low as possible for the quality of trees we offer.

Wholesale Prices of all Varieties of Apple Trees

		Each	10	100
Largest size,	2 year, 6 to 7 ft.....	\$0.20	\$1.50	\$9.00

4-foot Special (well branched, 2 years old).....				5.00

(Send us your list for special prices on large lots—we will be pleased to quote you.)

Summer Varieties

DUCHESS OF OLDENBURG—Of Russian origin. Large size, roundish, streaked with red and yellow; flesh whitish, juicy; flavor sprightly sub-acid; tree a vigorous grower, very hardy; very early and abundant bearer. While it is indispensable in the North it is almost equally so in the South. September.

EARLY HARVEST—Medium to large; pale yellow; fine flavor. Tree a moderate, erect grower, and a good bearer; a beautiful and excellent variety for both

orchard and garden. Middle to end of August.

EARLY STRAWBERRY—Medium, striped with deep red; tender, sub-acid and excellent; a poor grower but productive. August.

RED ASTRACHAN—Large, roundish; nearly covered with deep crimson, over-spread with a thick bloom; juicy, rich, acid, beautiful. The tree is a vigorous grower, with large foliage and a good bearer. August.

SWEET BOUGH—Large, pale greenish yellow; tender and sweet. Moderate grower and good bearer. August.

YELLOW TRANSPARENT—A Russian variety. Tree an upright grower and a

very early and abundant bearer. Fruit of good size; skin clear white, turing to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest.

Autumn Varieties

ALEXANDER—Of Russian origin. Large; deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

AUTUMN STRAWBERRY—Medium, streaked, tender, juicy, fine, vigorous and productive. September to October.

DUCHESS OF OLDENBURG—Of Russian origin. Large size; roundish; streaked with red and yellow; flesh whitish, very juicy, flavor sub-acid. Tree vigorous grower. Very hardy, early and abundant grower. Ripens in August and September. One of the most profitable commercial sorts grown.

FALL PIPPIN—Very large; yellow; tender, juicy and of rich flavor. One of the best. October and November.

GRAVENSTEIN—Large to very large; striped red and yellow; tender, juicy and

high flavored. One of the best of all fall apples. Tree a vigorous grower; very productive; a good market apple. September to October.

MAIDEN BLUSH—Large; pale yellow with red cheek; flesh very tender. Tree a good bearer; a good commercial kind. September to October.

POUND SWEET (Pumpkin Sweet)—A very large, round, yellow russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October and November.

WEALTHY—Medium size; round, smooth and deep red; juicy; sub-acid and of good quality. Very hardy, good grower and productive. One of the best market kinds for late fall or early winter. October to January.

Winter Varieties

BALDWIN—The old stand-by, the kind your neighbor has. Large, bright red, crisp, juicy and of rich flavor. One of the most profitable apples grown for home use as well as for market. December to April.

BEN DAVIS—Large, striped red, fair quality. Late keeper, good business apple. Tree hardy and productive. December to April.

DELICIOUS—A remarkable variety rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red; flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. For this variety add 3 cts. per tree.

FAMEUSE (or SNOW)—Medium size, roundish; deep crimson; flesh snowy white; tender, juicy, of high flavor. A good dessert kind; fine for market purpose. November to January.

GANO—An improved Ben Davis, nearly covered with deep, dark red.

GOLDEN RUSSET—Medium to large size, dull russet, with a tinge of red on the exposed side; flesh greenish, crisp, juicy, and high flavored; hardy, bears well. November.

GRIMES GOLDEN—Large size. Rich golden yellow; of highest quality. Tree hardy, vigorous and very productive. January to April.

HUBBARDSTON NONESUCH—Large; striped yellow and red; of the highest quality. Tree hardy, vigorous, and a good bearer. One of the best to plant for commercial purposes. November to January.

JONATHAN—Medium size; deep red and yellow; flesh tender, juicy and rich. Tree a moderate grower but good bearer. One of the best sorts for home use or for commercial purposes. November to March.

KING—The king of them all; the old reliable. Handsome, striped red, of the largest size. Quality good. Tree hardy, vigorous and very productive. November to March.

MAMMOTH BLACK TWIG—One of the most profitable of all apples. Like the famous Winesap, but a better grower. A good keeper. November to March.

MCINTOSH RED—Large; flesh white, tender and juicy; a very popular kind; sub-acid. November to February.

NORTHERN SPY—Large, roundish, striped red; flesh tender and juicy; rich and very high flavored. A good keeper and profitable for planting. January to June.

NORTHWESTERN GREENING—This apple is one of the best keepers we have—keeping in good condition generally till May. The apple is very large and of beautiful form, and being of fair quality is bound to become very popular. The tree, when young, is a fine, upright grower; spreading top when bearing.

PEWAUKEE—Medium size, yellow splashed with red; tree vigorous and hardy. January to June.

ROME BEAUTY—Large, yellow, shaded with bright red; flesh yellowish, tender, juicy, sub-acid; moderate grower. November to February.

ROXBURY RUSSET—Medium to large; greenish or yellow russet; crisp, good, sub-acid flavor. Tree vigorous and productive; very popular on account of its long keeping. June.

R. I. GREENING—The best of the green winter sorts and very well known. Good cooking kind, good keeper and very valuable for commercial planting. November to March.

SEEK-NO-FURTHER—Medium to large, slightly russeted, with dull red stripes; tender, rich, spicy and fine; good grower and bearer. November to February.

SPITZENBURG—A very popular apple, covering a large area; fair size, deep red; good keeper. Valuable to plant for commercial purposes. November to April.

STARK—One of the best all-purpose apples grown. Large, roundish, golden green, shaded with dark and light red; flesh yellowish, juicy, mild and sub-acid. Early and annual bearer and a very valuable commercial sort. Season January to May.

STAYMAN'S WINESAP—The best of the Winesap family without any exception; although a seedling of Winesap it is five times than any other variety. Tree a much larger, better and more productive grower. December to April.

SUTTON BEAUTY—We have a few fine specimens of Sutton Beauty. Fruit is large, handsome, striped with crimson; flesh white, tender and sub-acid.

TALMAN SWEET—Medium size, pale yellow, slightly tinged with red; flesh firm, rich and sweet; most valuable cooking apple, good market sort. Season November to April.

WAGENER—Medium to large; deep red in the sun; flesh firm, sub-acid and rich. Very productive, bears young. December to May.

WINESAP—Medium size, dark red, sub-acid, excellent. Tree a moderate grower and abundant bearer. A favorite market variety in the West. Season December to May.

WINTER BANANA—Fruit large size, perfect in form, golden yellow and beautifully shaded and marbled with bright crimson red; flesh yellow, fine grained, sub-acid. Rich in flavor and of the highest quality; a good keeper. Tree is a remarkably strong grower and on account of its great hardiness will thrive in any climate. Its early bearing habit is something unusual, as it often bears at one and two years old while in the nursery row. November to January.

WOLF RIVER—Very large greenish yellow, covered with crimson. Tender, spicy, sub-acid. One of the finest apples grown; for the market it has few equals. Season January to March.

YELLOW BELLEFLOWER—Season winter. A hardy apple of large size and beautiful golden color, often with red blush; conical in shape.

YORK IMPERIAL—Medium size, whitish shaded with crimson; flesh firm, crisp, juicy, pleasant, mild sub-acid. Tree very vigorous grower and a good bearer. One of the most valuable for commercial orchards. November to March.

Crab Apples

The trees are noted for their hardiness and vigor and usually bear the second season after planting. For jellies and preserves the crab apple is unsurpassed. Prices same as on Standard Apples.

BEST HARDY CRAB APPLES

GENERAL GRANT—Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained, a good grower, hardy and productive. September.

HYSLOP—Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; good for cider and culinary purposes; popular on account of its large size, beauty and hardiness. October.

TRANSCENDENT CRAB APPLE—This is probably one of the best of all crab apples; is popular over the entire coun-

try. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The fruit of this crab is held in great esteem by housewives for making jelly, pickles and preserves. The fruit is $1\frac{1}{4}$ to 2 inches in diameter, bright yellow, striped with red; excellent for culinary use. Immensely productive. September to October.

WHITNEY—Large, greenish striped with carmine; flesh firm, juicy, rich. Last of August.

Peaches

Of late years peach growing has met with great favor among the fruit growers everywhere. It is no longer confined to certain sections as in the past, but its usefulness and good qualities are fast appealing to the village lot owner as well as the commercial orchardist. The peach tree can be grown on any kind of soil, is free from disease and comes into bearing young. There is always a good market for peaches, no matter where you are located. We will be pleased to quote prices on large lots on receipt of list. Those desiring trees for orchard planting should place orders early.

The following list represents a selection of the very best varieties covering the entire season:

Prices on all Varieties of Peach Trees

		Each	10	100
Large size,	1 year, 4 to 6 ft.....	\$0.20	\$1.50	\$10.00
Medium size	“ 3 to 4 ft.....	.15	1.10	7.50
Small size,	“ 2 to 3 ft.....	.09	.65	5.00

BELLE OF GEORGIA—Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific; fine shipper. Ripens with Crawford's Early.

CARMAN—Large, resembles Elberta in shape; color creamy white or pale yellow with deep blush; skin very tough, flesh tender, fine flavor and quite juicy. Ripens with Early Rivers.

CHAIR'S CHOICE—Deep yellow with red cheek; firm; few days earlier than Smock. September.

CHAMPION—A large, handsome early variety, creamy white with red cheek, sweet, rich and juicy. Hardy and productive. August.

CRAWFORD'S EARLY—A magnificent large yellow peach of good quality. Early in September.

CRAWFORD'S LATE—A superb, large yellow peach. One of the best. Late September.

CROSBY—One of the hardiest, abundant bearer; medium size, bright yellow, fine quality. Middle September.

ELBERTA—The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, freestone. Season medium early, following quick upon Early Crawford. Early September.

ENGLE'S MAMMOTH—Large, yellow; resembles Late Crawford but more productive. September.

FITZGERALD—Fruit large; brilliant color, bright yellow, suffused with red; flesh deep yellow, best quality. September.

FOSTER—Large, deep orange red, flesh yellow; very rich and juicy. Last of August.

GOLD DROP—Medium size, hardy, very productive, good quality, early bearer. Last September.

GREENSBORO—The largest and most beautifully colored of all the early varieties. Double the size of Alexander, ripening at the same time. Flesh white, juicy and good. July.

HILL'S CHILI—Medium, dull yellow. Extra hardy and productive. Late September.

KALAMAZOO—A leading market sort. Large, yellow, fine quality. Extra productive and profitable. Early September.

MOUNTAIN ROSE—Large, red; flesh white, juicy, excellent. One of the best. August.

NIAGARA—A very large yellow peach, originated in Western New York, where it has been well tested and said to be the best orchard variety for that section, surpassing both Elberta and Crawford in size, color, quality and vigor; ripens between Crawford and Elberta.

OLD MIXON FREE—Large, pale yellow, deep red cheek; white flesh, tender, rich, good. September.

REEVES—Large, yellow, with red cheek; juicy, melting. A good hardy sort. September.

SMOCK FREE—Large, yellow and red; bright yellow flesh. Valuable for market. Late September.

STUMP THE WORLD—Very large white, with a bright red cheek. End of September.

TRIUMPH—Ripens with Alexander, blooms late, sure and abundant bearer; strong, vigorous grower. Fruit good size, yellow with red and crimson cheek.

WAGER—Medium, yellow, good quality. Tree hardy, healthy, long-lived, productive. Early September.

WHEATLAND—Large, golden yellow; flesh yellow, juicy, sweet and of fine quality. September.

YELLOW ST. JOHN—Nearly as large as Crawford, fully equal in color. Fruit round, brilliant, showy; one of the earliest yellow peaches. August.

Cherries

The cherry attains its highest perfection on gravelly soil, but will do well on any except damp, soggy ground. It requires but very little attention, and bears abundant crops of delicious and refreshing fruit. Canneries are being built in all sections of the country where cherries are grown. It is easy to dispose of your fruit, and it is one of the most profitable under cultivation. Cherry orders should be placed early to avoid disappointment.

Prices on all Varieties of Sour Cherries

			Each	10	100
Large size,	2 year,	4 to 5 ft.	\$0.30	\$2.75	\$24.50
Medium size,	"	3 to 4 ft.	.25	2.25	19.50
Small size,	"	2½ to 3 ft.	.17	1.50	12.00

Select Varieties of Sour Cherries

BALDWIN—Fruit very large, almost round, dark red; the sweetest and richest of the Morello type. Remarkable for its quality, vigor, hardiness and productiveness. Particularly profitable in the West. June.

DYEHOUSE—Ripens several days before Early Richmond; is of good quality and very productive. Fruit of medium size, color red. Fine for preserving and cooking purposes.

EARLY RICHMOND—This is a hardy cherry, fruiting on young trees soon after planting and bearing regularly every year enormous crops of dark red fruit that does not rot upon the trees and can be left without picking longer than most varieties. One of the very best for canning and profitable for market. June.

ENGLISH MORELLO—Very dark red, acid, of good quality, and owing to its rich red color looks much better when canned than the Early Richmond. Ripens from July 4th to 15th. Bears very young.

LARGE MONTMORENCY—The most popular of all hardy cherries for market or home use. The fruit is in great demand and sells at fancy prices. Montmorency has been growing in popular-

ity all over the country each year, so that it has been almost impossible to grow trees fast enough to keep up with the demand. It is of large size, dark red in color, stem rather short. Tree is a very healthy and vigorous grower. Some of the large planters have whole orchards of this one variety.

MAY DUKE—An excellent variety with large, dark red fruit; flesh juicy and rich, almost sweet. Tree is rather dwarf in habit.

LOUIS PHILLIPS—Large and beautiful fruit of blackish red; flesh tender; mildly acid. One of the best. Mid-July.

OSTHEIME—A perfectly hardy, very late blooming variety from Germany. Fruit large, heart-shaped, nearly black when ripe; flesh juicy and rich. Fine for dessert and cooking; also finds ready sale on all markets. Does well in the West. Ripens in July.

WRAGG—Originated in Iowa and has become very popular in the Northwest and Western States. Fruit medium to large, dark red and of fine quality. Tree is very hardy, vigorous and productive. This is one of the few cherries of good commercial quality that is perfectly hardy. Ripens in July.

Mr. John W. Finn,
Dansville, N. Y.

East Dorset, Vt., May 8, 1914.

Dear Sir: I wish to thank you for your rose bushes and pear trees. They were splendid stock and arrived in first class condition. I did not expect more than I ordered. I will do my share to advertise your nursery. Thank you for your generosity.

Very truly yours,
M. A. Stuart.

Sweet Cherries

Prices on all Varieties of Sweet Cherries

		Each	10	100
Large size,	2 year, 6 to 7 ft.....	\$0.35	\$3.00	\$26.50
Medium size,	" 5 to 6 ft.....	.30	2.50	22.00
Small size,	" 4 to 5 ft.....	.25	2.00	17.00
Special (branched),	" 3 to 4 ft.....	.17	1.35	11.00

BING—One of the most delicious sweet cherries grown. Tree very hardy and vigorous with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black and of very fine quality. Bing is a good shipper and should be planted with Lambert for commercial purposes.

BLACK TARTARIAN—Very large; bright purplish black, half tender, juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. Ripe last of June.

GOV. WOOD—One of the best. Clear, light red; tender and delicious. Tree vigorous and productive. End of June.

LAMBERT—A valuable sweet cherry of the largest size. Skin dark purplish red, almost jet-black when ripe; flesh

firm, rich and juicy. Tree hardy, a strong grower and an enormous bearer.

NAPOLEON—Fruit very large, oblong, pale yellow, with a bright red cheek in the sun. Flesh very hardy, brittle, reddish at stone, juicy and sweet. Tree a vigorous and erect grower, very productive. Early in July.

SCHMIDT'S BIGARREAU—Black; flesh dark, firm; very productive. Is one of the best firm fleshed cherries of the largest size. July.

WINDSOR—Fruit large; liver colored, resembling the Elkhorn, ripening a few days after that variety; flesh remarkably firm, of fine quality. Tree hardy and prolific, vigorous. Middle of July.

YELLOW SPANISH—Large, pale yellow, with red cheek; firm, juicy and excellent; one of the best light colored cherries; productive. Last of June.

Plums

There are two kinds of plums—Japanese and European. We recommend the Japanese varieties. The value of this race of plums is no longer in doubt. Trees of tremendous vigor, they come into bearing two or three years after planting, and in such variety and season of ripening as to cover a period of three months, with a daily supply of luscious fruit. They are beautiful in appearance, superior in quality, and will keep from ten days to two weeks after picking—a great point in their favor in marketing. European Plums are so well known that comment is unnecessary and our stock is exceptionally complete in this line.

Prices on all Varieties of Plum Trees

		Each	10	100
Large size,	2 year, 5 to 7 ft.....	\$0.25	\$2.25	\$19.00
Medium size,	" 4½ to 5 ft.....	.20	1.75	15.00
Small size,	" 3 to 4½ ft.....	.15	1.25	10.00

Japanese Plums

ABUNDANCE—Fruit large and beautiful, amber turning to bright cherry red; flesh yellow, tender, juicy, rich. Vigorous and productive. Valuable for market. August.

BURBANK—Very large; clear cherry red; flesh deep yellow, sweet, with a very agreeable flavor. Bears young and abundantly; good keeping and shipping qualities; excellent commercial sort. August, later than Abundance.

CLIMAX—Very large; deep rich red; fine flavor. One of the earliest to ripen.

OCTOBER PURPLE—Large, round; reddish purple; good quality. A strong growing tree; bearing immense crops.

Very valuable market sort. First of October.

RED JUNE—Medium to large; deep vermilion red, very showy; flesh light lemon yellow, firm, delightful. The best early market sort. We recommend it for commercial orchard planting. Last of July.

SATSUMA—Large; reddish purple; quality fine, delicious for canning. September.

WICKSON—Very large; deep red with white bloom; flesh firm, sugary, delicious. Remarkably long keeping qualities and an excellent commercial sort. September.

European Plums

Prices on European Plums the same as Japanese

BEAUTY OF NAPLES—A new variety of the highest promise; size large, color greenish-yellow, flesh firm, juicy and very fine flavored. Tree very hardy and prolific. Middle of September.

BRADSHAW—Large; dark red; flesh green, juicy; productive; fine for market. August.

COE'S GOLDEN DROP—Large; light yellow; flesh firm, rich and sweet. Last of September.

FELLEMBURG (Italian Prune)—A fine late prune; oval, purple; flesh juicy and delicious; very free stone. Good commercial sort. September.

FRENCH DAMSON—Medium size; dark copper color. Very hardy and an annual bearer. Tree a light grower. October.

GERMAN PRUNE—A large, long, oval variety, much esteemed for drying; color dark purple; of very agreeable flavor. September.

GEUII—Fruit very large, deep bluish purple, covered with a thick bloom; flesh yellowish green, coarse, sweet and pleasant; great bearer and very early. Tree a hardy and rapid grower. September.

GRAND DUKE—Large; violet red, fine quality, free from rot; very productive. Tree a moderate grower. Last of September.

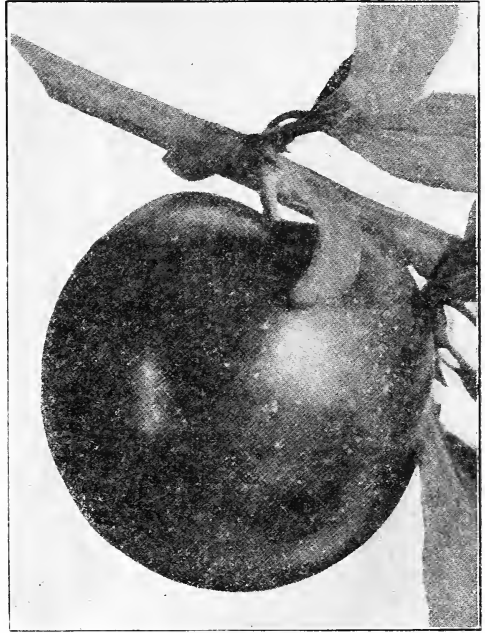

IMPERIAL GAGE—Large; pale green, juicy, sweet, rich, and excellent. Middle of August.

LOMBARD—Medium; violet red, juicy, good; hardy and productive. The leading market variety. August.

MOORE'S ARCTIC—Small; purplish black, juicy, sweet; immense bearer; one of the hardiest in bud and bloom. September.

MONARCH—Tree robust, dense foliage, an abundant bearer. Fruit very large, roundish, oval, dark purplish blue, perfect freestone. Good for market. Last of September.

NIAGARA—This plum has become exceedingly popular through Western New York, where it originated. It is a very early plum, and valuable for this reason. It is red, large size, makes an attractive appearance in market, and possesses good shipping qualities. It bears

BURBANK

enormous crops of fruit with great regularity. The tree is an upright grower, vigorous and healthy.

REINE-CLAUDE (Bavay's Green Gage)—Very large, greenish yellow; juicy, excellent and of fine quality. Not liable to rot. Good bearer and valuable for commercial orchards. September.

SHIPPER'S PRIDE—Large; dark purple, very showy, often measuring two inches in diameter; fine, juicy and sweet. September.

SHROPSHIRE DAMSON—Large; amber color; juicy and sprightly; productive and not liable to rot. Good commercial sort. September.

YELLOW EGG—Large and beautiful; productive, egg shaped, yellow. Flesh coarse, but good for cooking. August.

YORK-STATE PRUNE—Large; blue, rich, juicy, fine. Best prune for market or garden. This prune originated here at Dansville as a seedling from German Prune and has been sold to fruit buyers for that variety in large quantities at profitable prices. Tree a vigorous grower and good bearer.

No Scale has ever been found in our Nursery.

Pears

Our Pear trees are grown on heavy clay soil especially adapted to the production of strong, vigorous stock. No better trees can be grown. They are fast becoming popular as a table and market fruit and are highly prized for canning by most people.

Prices on all Varieties of Standard Pears

			Each	10	100
Large size,	2 year,	5 to 7 ft.....	\$0.25	\$2.25	\$19.00
Medium size,	"	4½ to 5 ft.....	.20	1.60	14.00
Small size,	"	3 to 4½ ft.....	.14	1.20	9.00

Summer Varieties

FLEMISH BEAUTY

CLAPP'S FAVORITE—A superb, large, long, yellow pear, richly flushed with russet-red next the sun; juicy and delightful; ripens before Bartlett. Pick the fruit of this variety at least ten days before it would ripen on the tree. August.

KOONCE—A very popular early variety. Fruit medium to large, yellow, one-half nearly covered with red. Does not rot at the core. Tree vigorous, free from blight; upright, handsome grower. Very productive and a good shipper.

LAWSON—Tree healthy, a strong grower, early bearer and profitable sort; of splendid quality for a very early pear. Red cheek with yellow shading.

TYSON—Medium in size; yellow with russet shading; melting, sweet, rich and aromatic. August.

WILDER—One of the very earliest pears, attractively colored and of excellent quality, this new variety always finds a sale in market and is largely grown by commercial orchardists. Of medium to large size, irregular, bell-shaped, but with smooth surface; pale yellow with shadings of russet-red. The tree bears good crops early and annually. Early August.

BARTLETT—Large; color when fully ripe is waxen yellow with red blush; juicy, melting, high-flavored. The tree bears early and abundantly. One of the finest eating pears and extra fine for canning. The most popular sort, both for home use and market.

Autumn Varieties

BEURRE CLAIRGEAU—Very large, pyriform; yellow and red; nearly melting, high-flavored. Tree a very good grower; an early and abundant bearer; a magnificent market fruit. One of the finest acquisitions. October and November.

BEURRE D'ANJOU—A large, fine pear, buttery and melting, with sprightly, vinous flavor. Tree a fine grower and good bearer; keeps into mid-winter. The most valuable pear in our list. October to January.

DUCHESSE D'ANGOULEME—Among the largest of all our really good pears; greenish yellow, splashed with russet; flesh white, juicy, rich flavored. It succeeds well as a standard, but grown as a dwarf is the most profitable and lus-

cious of all market varieties. We recommend it also for the home garden. October and November.

FLEMISH BEAUTY—This fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. September and October.

HOWELL—Large; yellow, with red cheek; early bearer and productive. September and October.

ROSSNEY—A new and excellent pear, raised from seed at Salt Lake City, Utah. In size medium to large; very fine grain, flesh melting, juicy, very sweet. Ripens two weeks after Bart-

lett; it is an excellent keeper and shipper, with tree much stronger than Kieffer. It is very seldom you can find a single variety combining so many rare qualities as this does, and we have great pleasure in offering it as the best pear on the market at the present time. 1 year No. 1, 30c each; \$2.50 per 10.

SECKEL—A beautiful and delicious little pear that is the standard of excellence in its class. One of the richest and highest-flavored pears known, always in demand for desserts and luncheons, and better known than any pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

SHELDON—A large, round, russet-and-red

pear of the very first quality. Hardy, free-growing, fruitful. October.

VERMONT BEAUTY—Of medium size, roundish, yellow, heavily shaded with carmine; flesh exceedingly fine, sweet and juicy. The tree makes a strong, healthy growth and bears good crops. October.

WORDEN-SECKEL—A worthy seedling of the famous old Seckel, quite as sweet and luscious, with the same rare flavor and aroma. Is superior to the Seckel in size, beauty and keeping qualities. The fruits are beautifully smooth and regular, golden yellow with russet-red cheek, and sometimes keep from October until Christmas. The tree makes a more rapid and upright growth than Seckel and excels it in productiveness.

Winter Varieties

KIEFFER—One of the best market varieties and an excellent keeper. This superb variety is often underestimated, because large quantities of it are shipped to market in immature condition and before the fruit has attained proper size. However, there are few pears that are more attractive than the Kieffer, if it is allowed to hang on the tree until the beginning of October, and is then carefully ripened in a cool, dark room. If handled in this manner the quality of the flesh is the best, exceedingly juicy, and of sprightly sub-acid flavor. Kieffer pears are being planted more and more by the largest commercial fruit growers of the country, and this fact is sufficient proof that the merits of this excellent sort are more and more recognized. The trees are apt to set too much fruit, and in order to obtain choice fruit of large size, it should be thinned early in the season. For best results, one-tenth of a Kieffer pear orchard

should be planted with LeConte pears, as this is the best pollenizer.

LAWRENCE—About medium; yellow, thickly dotted, and possesses a very fine, rich flavor. Tree a moderate grower and very productive. December to January.

LE CONTE—Vigorous and prolific sort. Fruit large, with smooth, yellow skin: flesh juicy and firm. Good shipper.

LINCOLN CORELESS—Keeps well until middle of March. Very large, handsome, of good quality, and with but few, if any seeds. Distinguished for its very small amount of core and seed, some specimens being almost entirely without either. Color golden yellow.

PRES. DROUARD—Large, melting, juicy with delicate perfume. November and December.

WINTER NELIS—One of the best early winter pears; medium in size and has dull russet color; rich and sprightly flavor, and bears very heavy crops.

On All Grades of Kieffer Deduct 5 Cts. Less per Tree from Regular Pear Prices

Dwarf Pears

All Budded Trees on Whole Roots of Imported French Stock

	Each	10	100
Large size, 2 year, 4 to 5 ft.....	\$0.25	\$2.25	\$20.00

Small size, " 2 to 3 ft.....	.15	1.25	10.00

We have the following varieties in Dwarf Pear: Duchess d'Angouleme, Anjou, Bartlett, Clapp's Favorite, Louise Bonne, Seckel and Wilder.

Mr. John W. Finn,
Dansville, N. Y.

Auburn, Maine, April 15, 1914.

Dear Sir: Received the trees and they are very fine; they also arrived in first class condition.

Very truly yours,
Mrs. R. P. Decker.

Quinces

The quince is the old reliable for jellies, preserves and flavoring. The tree does well on any good soil, is a regular and abundant bearer of large, golden fruit and requires but little attention. It always brings good prices on the market where the demand is seldom met.

Prices on all Varieties of Quince Trees

	Each	10	100
Large size, 2 year, 4 to 5 ft.....	\$0.30	\$2.50	\$22.50
Medium size, " 3 to 4 ft.....	.25	2.00	17.50
Small size, " 2 to 3 ft.....	.20	1.50	12.50

BOURGEOIS—Tree a remarkably strong grower, surpassing all others, yielding immense crops; fruit of large size, round, rich, golden color; very tender when cooked. Will keep until February in good condition.

CHAMPION—A prolific and constant bearer, fruit averaging larger than the Orange, more oval in shape, quality ex-

tra fine and a long keeper; bears very young. Ripens late.

MEECH—Fruit large, pear-shaped, orange yellow; good quality.

ORANGE—Fruit large, bright yellow, of excellent flavor. A vigorous grower and an immense producer.

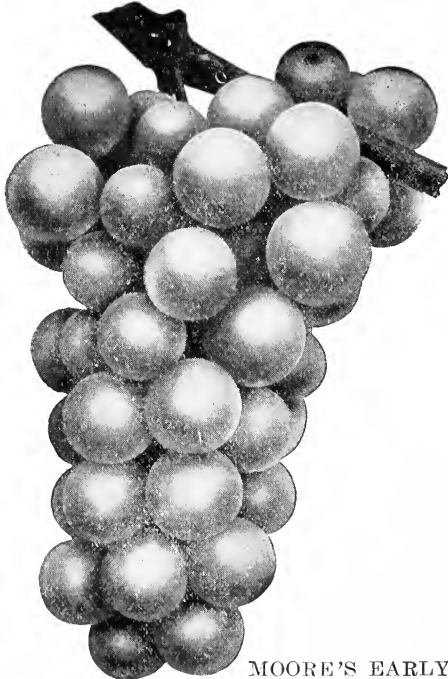

REA'S MAMMOTH—A seedling of the Orange, averaging much larger, and of the same form and color.

Small Fruit Department

We are better prepared to supply our customers with Grapes, Currants and Berries than ever before. They are indispensable and should be in every garden lot. They cut down the high cost of living and supply you with an abundance of the healthiest fruit, and practically your only labor is the picking. You should include in your order at least a few plants of these fine fruits.

Grapes

Price: 2 year strong vines, 10 cts. each; 10 for 90 cts.; 100 for \$5.00; \$43.00 per 1000.

MOORE'S EARLY

AGAWAM (Rogers No. 15)—A dark red grape with fine flavor. Large bunch and berry, rich, sweet and aromatic; strong grower and very productive. Last of September.

BRIGHTON—A large, delicious, sweet red grape; vine thrifty and a strong grower; flesh sweet, tender and very juicy. Best of all large red grapes. First of September.

CAMPBELL'S EARLY—Black, with purple bloom; bunch and berries large. Juicy, with rich, sweet flavor; almost seedless. Hardy and of vigorous growth. Fruit hangs on vines sound and perfect for ten weeks or more after ripening.

CATAWBA—An old favorite red grape, grown extensively for commercial purposes in New York State. Berries large and round; flesh fine flavored. Late September.

CONCORD—Decidedly the most popular grape in America. There are more Concord plants by vineyardists than all other varieties combined. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets. For general cultivation the most reliable and profitable variety.

DELAWARE—Bunches small and compact; berries small, round, thin skinned, light red. Flesh very juicy, with an exceedingly sweet and delicious flavor. Vine hardy and productive.

MOORE'S EARLY—Bunch large, berry round; color black, with a heavy blue bloom; quality better than the Concord. Vine exceedingly hardy; has been exposed to a temperature of more than 20 degrees below zero without injury, and is entirely exempt from mildew or disease. Its earliness makes it desirable for an early crop, maturing as it does ten days before the Hartford, and twenty before the Concord. at the time of the Concord. Vines vigorous, healthy, very hardy and productive. Quality good.

NIAGARA—The vine is a strong grower and very hardy. Bunches very large and uniform and very compact; berries larger than Concord, and skin thin but tough, which insures their shipping qualities; quality good, very little pulp; melting and sweet to center; ripens before Concord.

POCKLINGTON—Bunch large; berry large, round, of a rich yellow color; flesh pulpy, juicy and of good quality; ripens

WORDEN—Said to be a seedling of the Concord. Bunch large, compact, handsome; berries large—larger than those of the Concord. It ripens a few days earlier, and is superior to it in flavor. Destined to become very popular for the vineyard and garden.

Currants

Price: 2 year strong bushes, each 10 cts.; 10 for 75 cts.; 100 for \$4.50; \$40.00 per 1000.

BLACK CHAMPION—Bush vigorous and productive; fruit averages above medium; pulp nearly sweet, mild-flavored. A desirable variety for general culture.

CHERRY (Red)—Fruit of very large size and very tart; plant vigorous, but not as productive as some of the other varieties.

FAY'S PROLIFIC (Red)—A cross between Cherry and Victoria. Of large size, fine flavor, and claimed to be twice as prolific as the Cherry. Highly commended by those who have seen or had experience with it.

PERFECTION—Large; red; fine. It is one of the most productive currants known, and quality superior to anything on the market. The flavor is rich, mild, sub-acid, with plenty of pulp and few

seeds. 2 yr., 15c each; \$1.25 per 10; \$10.00 per 100.

RED CROSS—A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

WHITE GRAPE—Very large; yellowish white, sweet or very mild, acid; excellent quality and valuable for the table. The finest of the white sorts.

WILDER—A remarkable new variety, both for table and market; strong grower, enormously productive; bunch and berry very large; bright red and of highest sub-acid quality, making it unequalled for the table, cooking or market.

Gooseberries

CHAUTAUQUA—Very large; one of the best. Superior quality and very productive.

DOWNING—Whitish green; vigorous and prolific. A fine reliable berry for general culture.

HOUGHTON—A medium sized American variety, which bears abundant and regular crops, and never mildews; fruit smooth, red, tender and very good; valuable.

INDUSTRY—An English variety, producing exceedingly large fruit of dark red color and delicious quality. Highly recommended both in this country and in Europe.

RED JACKET—An American seedling of large size; smooth, prolific and hardy, of best quality. A wonderful cropper.

Industry and Chautauqua, 20 cts. each; 10 for \$1.60; 100 for \$14.50. Other varieties, 15 cts. each; 10 for \$1.00; 100 for \$8.00.

Order early, while our stock is complete.

ST. REGIS

Berries

Raspberries—Black

Price: 10 for 40 cts.; 100 for \$1.40; \$12.00 per 1000.

CUMBERLAND—Plants vigorous, hardy and productive in most places; fruit large. Mid-season.

GREGG—Plants vigorous, hardy and productive; fruit above medium to very large.

KANSAS—Largest size; strong vigorous

grower, hardy, bearing immense crops. Size of Gregg. Brings highest price on the market.

PLUM FARMER—Berry large and very productive; a great favorite in Western New York. A fine picker and one of the best market sorts. Gives good satisfaction everywhere.

Raspberries—Red

Price: 30 cts. for 10; 100 for \$1.25; \$9.00 per 1000.

CUTHBERT—Large, conical, deep rich crimson; firm, of excellent quality. Vigorous grower, entirely hardy and immensely productive. The best raspberry for general culture.

MARLBORO—The best early red raspberry. Hardy and productive. Price same as for Cuthbert.

ST. REGIS—Another season's trial con-

firms all that has been said for this variety; it produced a fine crop of berries all through the fall of 1914. Fruit commences to ripen with the earliest and continues on young canes until October. Berries bright crimson, large size, rich, sugary, with full raspberry flavor. Flesh firm and meaty, a good shipper. 50 cts. for 10; 100 for \$2.50; \$20.00 per 1000.

Blackberries

Price: 4 for 25 cts.; 10 for 50 cts.; 100 for \$2.00; \$16.00 per 1000.

Mr. John W. Finn,
Dansville, N. Y.

Amherst, Mass., April 16, 1914.

Dear Sir: The trees we ordered came in good condition, and two or three more than we sent for, for which we thank you. I wish to order a few more. Inclosed find a money order for the second order. We were so pleased with them that we will try to make them last.

Very truly yours,
Silas E. Jay.

Mr. John W. Finn,
Dansville, N. Y.

Cornwall Bridge, Conn., April 29, 1914.

Dear Sir: Trees arrived O. K. and was more than pleased with them.

Yours truly,
C. B. Larch.

Mr. John W. Finn,
Dansville, N. Y.

Williamsville, N. Y., April 13, 1914.

Dear Sir: Trees arrived O. K. and were very satisfactory.

Yours truly,
Geo. H. Steinbrenner.

Mr. John W. Finn,
Dansville, N. Y.

Ridgefield Park, N. J., November 18, 1914.

Dear Sir: Received the trees and plants today. Everything in good condition. My friend Mr. Forgash and I wish to thank you for the extra trees.

Yours truly,
J. Lanfig.

Mr. John W. Finn,
Dansville, N. Y.

Elysburg, Pa., May 16, 1914.

Dear Sir: Received trees and berry bushes all right, and they are growing fine. Next year I will send you a larger order.

Very truly yours,
W. H. Knoebel.

Remember, we give 50 at 100 rate. Less than 50 at 10 rate.

Finn's Trees Have Pleased Their Customers and Thousands More. They Will Also Please You.

Mr. John W. Finn,
Dansville, N. Y.

Fulton, N. Y., May 8, 1914.

Dear Sir: I received some trees from you last week. They were so nice that I would like more of them. Please hurry this order as it is getting late in the season.

Yours truly,
G. P. Schnur.

Mr. John W. Finn,
Dansville, N. Y.

Schenectady, N. Y., November 21, 1914.

Dear Sir: I received the shipment of roses, which I assure you were in very fine condition. They were very fine stock.

Very truly yours,
F. Palmatier.

Mr. John W. Finn,
Dansville, N. Y.

Harpersville, N. Y., May 11, 1914.

Dear Sir: I am very well pleased with my apple trees, and can assure you that when I get ready for more trees you will surely get my order.

Yours truly,
Guy Hulbert.

Mr. John W. Finn,
Dansville, N. Y.

North Rose, N. Y., November 20, 1914.

Dear Sir: I received my trees all right. If I want any more trees will give you the order.

Very truly yours,
Guy Paine.

Mr. John W. Finn,
Dansville, N. Y.

Everett, Mass., May 4, 1914.

Dear Sir: I found the trees at Boscowen, N. H. O. K. when I got there April 19th. They are all nice trees and my men admired them. Will send you an order for next season.

Very truly yours,
Joseph Jackman.

Mr. John W. Finn,
Dansville, N. Y.

Burlington, Me., November 25, 1914.

Dear Sir: I received the trees and raspberry bushes O. K. They were the best trees that I have ever received.

Respectfully yours,
Mrs. Joseph Carey.

Mr. John W. Finn,
Dansville, N. Y.

Ashland, Mass., April 27, 1914.

Dear Sir: I wish to inform you that I received the trees O. K. and I am very well pleased with them.

Very truly yours,
Fred Youd.

Mr. John W. Finn,
Dansville, N. Y.

Mansfield, Ohio, September 8, 1914.

Dear Sir: I received the box of Norway Maples from you in the Spring of 1912. At that time I was located at Marlinton, W. Va., and as I guarantee all my trees for one year and set them out myself, your stock gave good satisfaction. I lost but one tree out of 100. Please send me the best prices on from 200 to 500 Norway Maples, as I think I can handle them.

Very truly yours,
F. A. Taylor.

Special Notice to Our Customers

DISCOUNT FOR CASH: I will allow a special discount of 10 per cent. on cash orders of \$5.00 or over received before March 10; after that date 5 per cent. on cash orders of \$5.00 or over.

TERMS: Cash with order, except with large orders, when satisfactory reference is given, and then the order must be accompanied by one-fourth cash.

BOXING AND PACKING: We box and pack all orders without charge.

SPRING PACKING SEASON: The Spring packing and shipping season usually begins here April 1st and continues into the month of May. The planting season is not regulated by any particular month or day nor by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. Hence, trees can be sent with safety from Dansville to localities several degrees south even if they do not arrive until after the ordinary transplanting season in that locality is past.

ORDERS SHOULD BE SENT IN as early as possible, as I enter them for shipment in the order received. When sent early they are most sure of prompt attention and there is less danger of varieties being exhausted. **Order Now**, do not wait until you are ready to plant. Your order will not be shipped until the proper time, or until you wish it.

PARTIES ORDERING are requested to state explicitly the mode of conveyance by which they desire their trees forwarded. When no route is designated we exercise our judgment, but in **no case** do we assume any responsibility after the packages are shipped, unless for our own mistakes. When losses occur by detention, claims should at once be made on the forwarders.

SHIPPING FACILITIES: My nurseries are located on the main lines of the D. L. & W. and Erie Railroads and the Adams and Wells-Fargo Express. This gives the purchaser the benefit of inexpensive delivery.

REFERENCES: Merchants' and Farmers' Bank, Dansville, N. Y., or any merchant in our city.

Distance for Planting

8 feet each way.....	680	33 feet each way.....	40
10 feet each way.....	430	40 feet each way.....	28
12 feet each way.....	302		

To estimate the number of plants required for an acre, at any given distance, multiply the distance between the rows by the distance between the plants, which will give the number of square feet allotted to

each plant, and divide the number of square feet in an acre (43,560) by this number, the quotient will be the number of plants required. This rule is followed by most orchardists.
